

Awesome Voice & Sounds

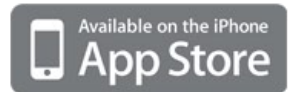

Preschool Connect the Dots Game!

The Preschool Connect the Dots Game bridges the gap between the traditional "Dot to dot" game and 21st century technology!

Children can "tap" or "draw" to connect sequential numbers (123), upper case letters (ABC), and lower case letters (abc). Joining all the dots forms the outline of the shape and reveals the beautifully illustrated image, a really fun sound effect, and the object name spoken by a licensed speech therapist that specializes in early childhood development!

With over 200 puzzles, kids will have fun learning numbers, the alphabet and fun items from several categories like Transportation, Musical Instruments, Animals & Bugs, Food, and Objects.

SHAPE BUILDER The Preschool Learning Puzzle Game

Shape Builder educates & entertains your little one with easy to move shapes that snap into place on top of silhouette puzzles. Each puzzle has 5 to 10 pieces &

after positioning all of the pieces, the real image is revealed along with a professional voice recording of the word spoken by a licensed speech therapist that specializes in early childhood development!

Including over 145 puzzles, Shape Builder encourages cognitive thinking & fine motor skills plus exposes young minds to new music instruments, animals, produce, objects & the alphabet in a fun & engaging format with LOTS of sound effects!
